

Tools

Link tester for structured cabling and patch cables, set of 2pc

P/N: LANTEST

features

- verifies links (e.g. outlet-patch panel), correctness of wiring and patch cables testing

Crimping tool for connector RJ45

P/N: HT-210C

features

- for crimping modular plugs RJ45
- build-in knife for aligning wires and removing outer isolation

Crimping tool for connectors RJ11, RJ14 and RJ45

P/N: HT-2008R

features

- for crimping modular plugs RJ11, RJ14 and RJ45
- build-in knife for aligning wires and removing outer isolation

Cutting pliers

P/N: HT-1091

features

- designed for reduction and elimination of redundant wires when terminating

Suitable for cables

up to Cu 1mm² (AWG 18)

Cable stripper

P/N: HT-S501A

features

- designed for removal of sheath and wire isolation
- suitable for all types of shielded and unshielded data cables

Suitable for cables

up to Cu 1mm² (AWG 18)

Cable stripper

P/N: CZABIBL1

features

- designed for removal of sheath and wire isolation

LSA insertion tool Krone®

P/N: 64172055-01

features

- designed for inserting LSA blocks in patch panels and outlets
- build-in scissors included
- build-in hook for tracking and removing wires

Insertion tool 110 IDC

P/N: FA-389T-110M

features

- designed for inserting 110 IDC blocks in patch panels and outlets
